FIELD PASSPORT

UK winter wheat · eight seasons of satellite-measured yield, gap attribution and weather risk — for every field

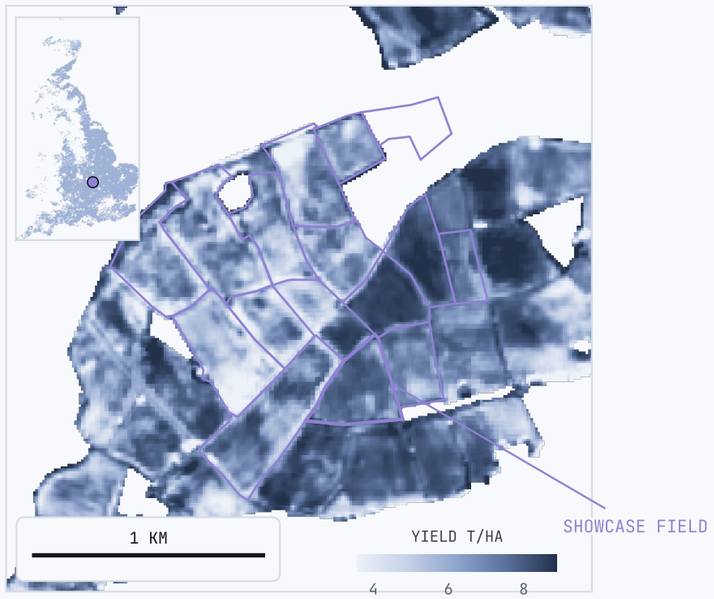

DEMO FARM · REAL RETRIEVALS

15 FIELDS · 139 HA · MODERATE-RAINFALL, MILD, HEAVY LAND, UPLAND

WINDOW 2018–2025 · 10 M RESOLUTION

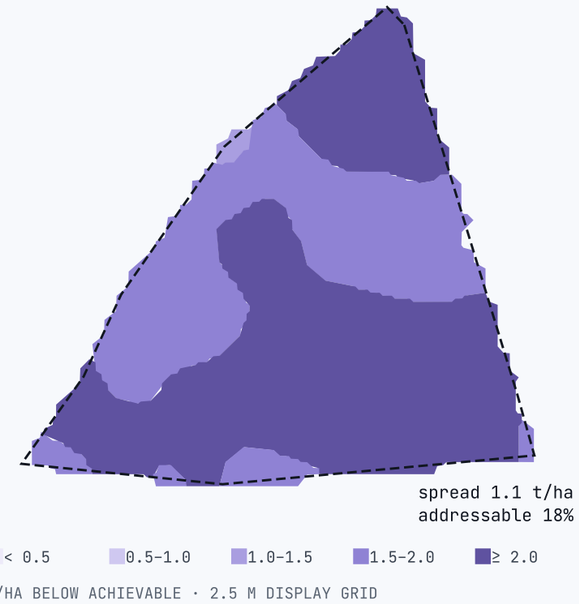

01 / SPATIAL — EVERY WHEAT FIELD, MEASURED

2022 harvest yield, 10 m — this farm's fields outlined; unshaded ground was not wheat that year

02 / WITHIN THE FIELD — WHERE THE GAP SITS

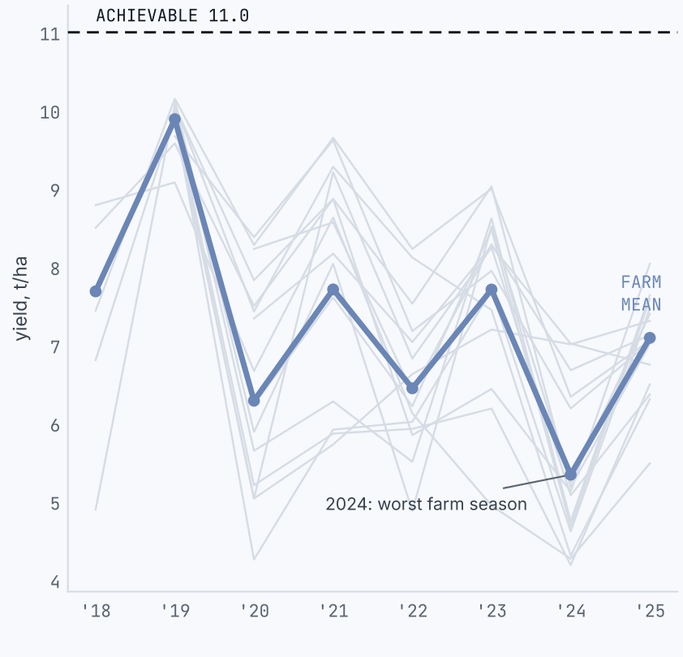

persistent yield gap, showcase field (9.3 ha)

T/HA BELOW ACHIEVABLE · 2.5 M DISPLAY GRID

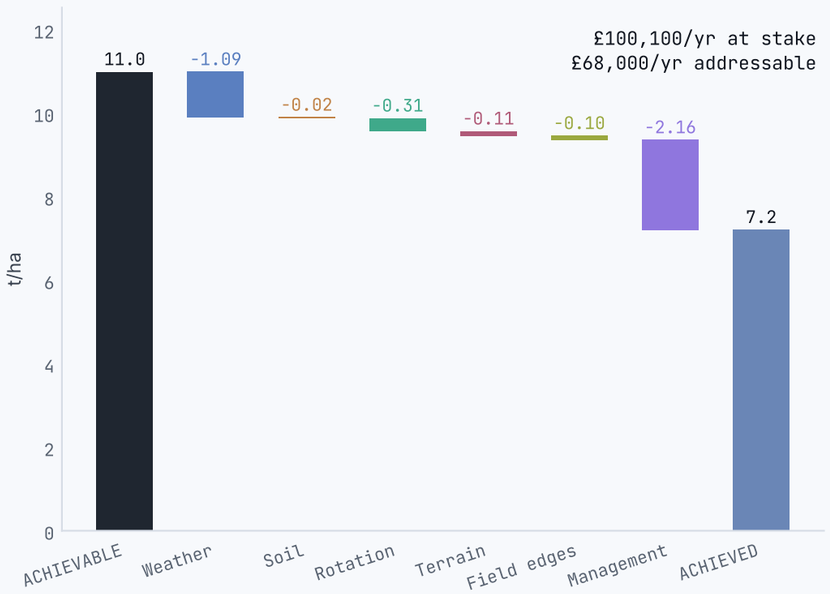

03 / SEASON BY SEASON

field means (thin), farm mean (bold) vs locally achievable

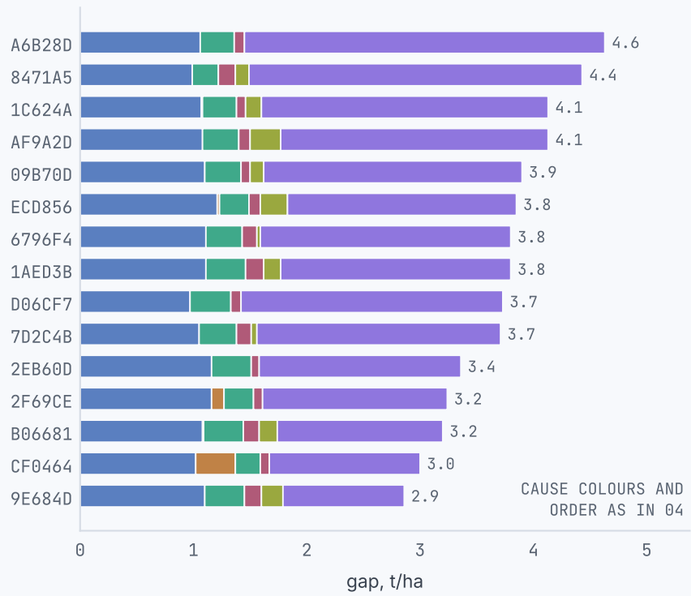

04 / THE GAP, DECOMPOSED

area-weighted across the farm — from achievable to achieved

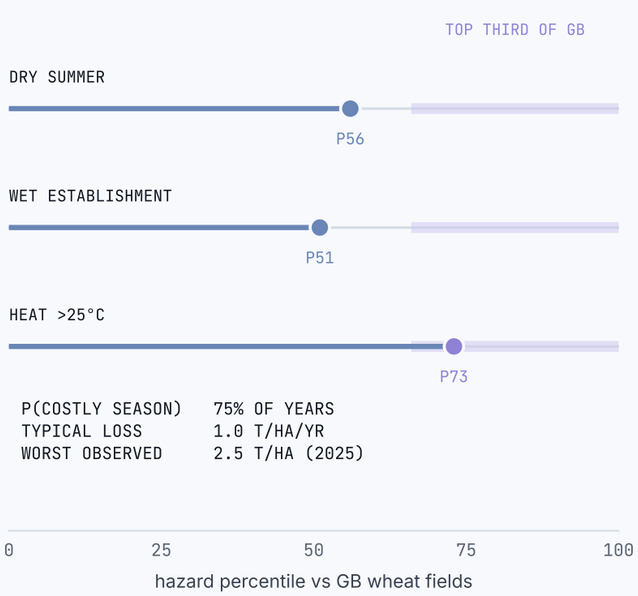

05 / DRIVERS, FIELD BY FIELD

each field's gap split into causes — sorted by total gap

06 / WEATHER RISK, FORWARD-LOOKING

hazard exposure vs GB wheat fields · realised weather losses 2018–25

EVIDENCE · ESA SENTINEL-2 2018–2025 · 10 M · ±1 T/HA PER FIELD-SEASON
