FIELD PASSPORT

UK winter wheat · thirteen seasons of satellite-measured yield, gap attribution and weather risk — for every field

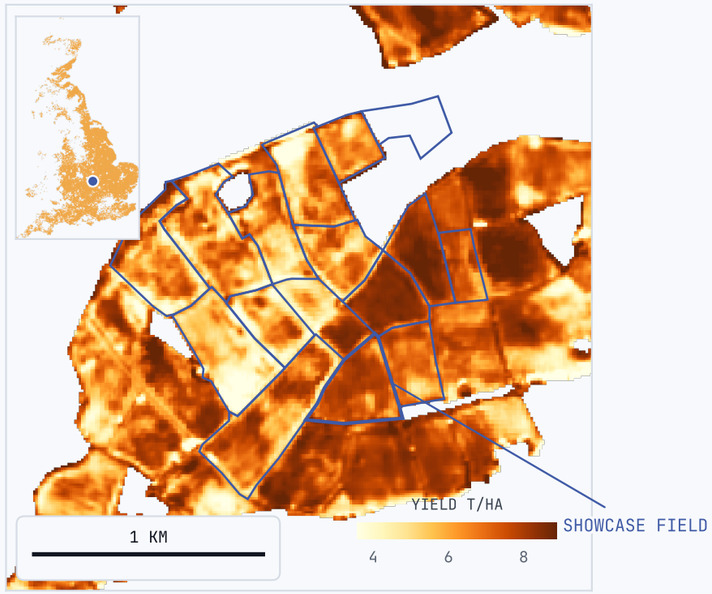

DEMO FARM · REAL RETRIEVALS

15 FIELDS · 139 HA · MODERATE-RAINFALL, MILD, HEAVY LAND, UPLAND

WINDOW 2013–2025 · LANDSAT + SENTINEL-2

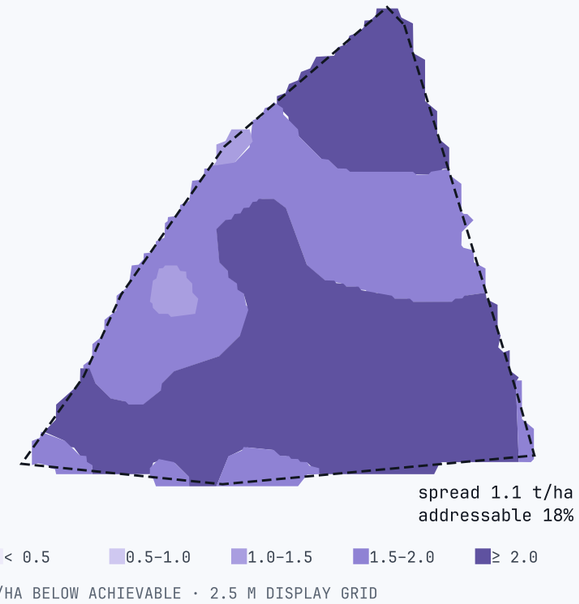

01 / SPATIAL — EVERY WHEAT FIELD, MEASURED

2022 harvest yield, 10 m — this farm's fields outlined; unshaded ground was not wheat that year

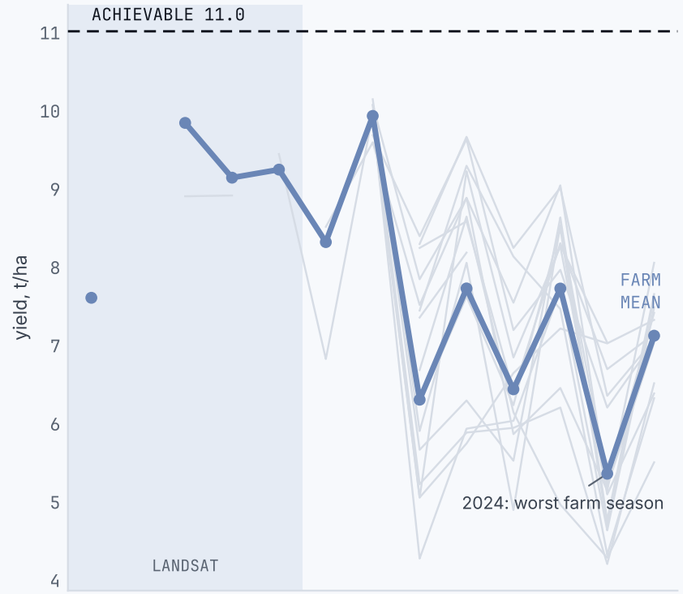

02 / WITHIN THE FIELD — WHERE THE GAP SITS

persistent yield gap, showcase field (9.3 ha)

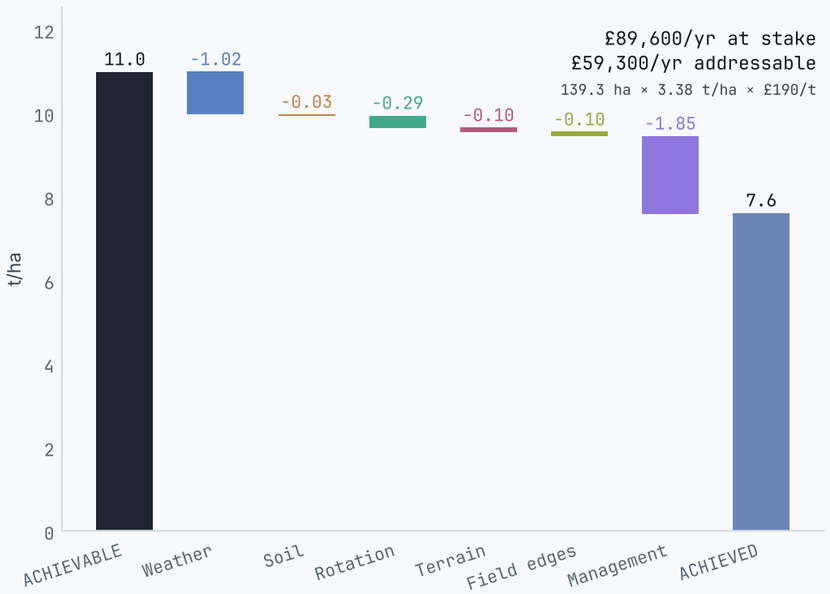

03 / SEASON BY SEASON

field means (thin), farm mean (bold) vs locally achievable

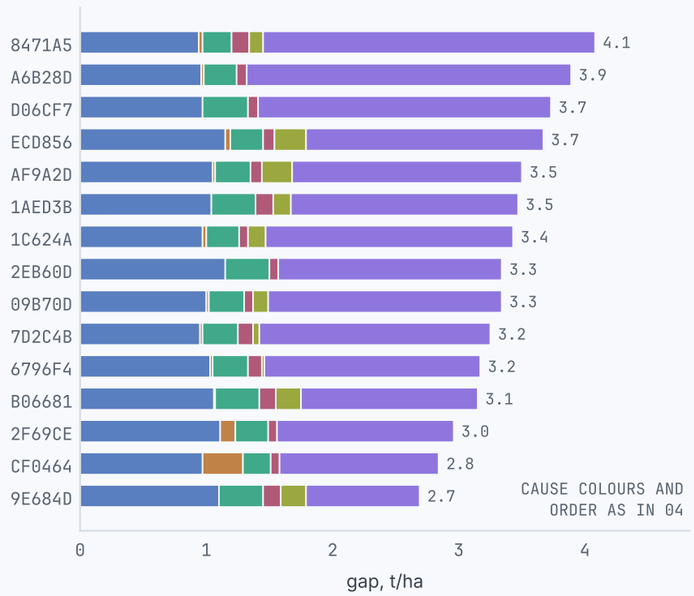

04 / THE GAP, DECOMPOSED

area-weighted across the farm — from achievable to achieved

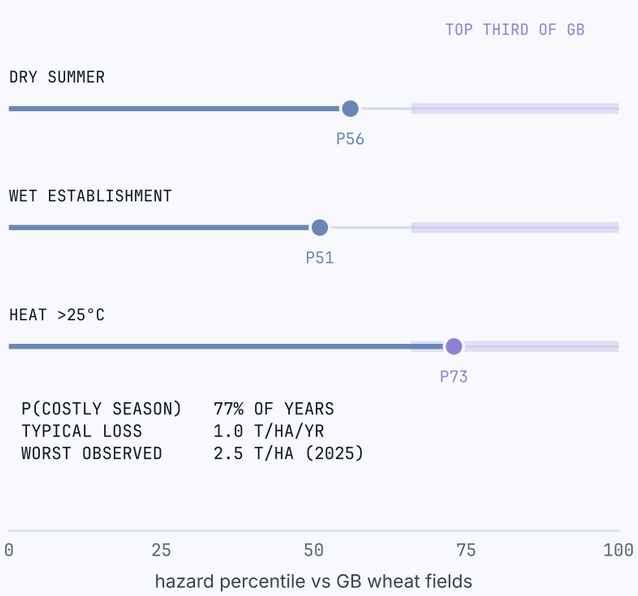

05 / DRIVERS, FIELD BY FIELD

each field's gap split into causes — sorted by total gap

06 / WEATHER RISK, FORWARD-LOOKING

hazard exposure vs GB wheat fields · realised weather losses 2013–25

EVIDENCE · LANDSAT 2013–2017 (30 M, RESAMPLED) · SENTINEL-2 2018–2025 · 10 M GRID · ±1 T/HA PER FIELD-SEASON · £ = INDICATIVE GROSS OUTPUT, NOT PROFIT
